

PostBase ten

POWERFUL, FLEXIBLE, DYNAMIC

PostBase ten

AWARD WINNING DESIGN

PostBase Ten is simply incredible at managing your daily postage tasks simply and easily.

We designed PostBase Ten to be intuitive and familiar to the user, allowing you to simply operate the machine as you would your smartphone, tablet or PC.

Super fast at up to 90 mailings per minute in dynamic and up to 110 in non-dynamic mode, saving you time and money.

The PostBase Ten Dynamic franking system unites high-tech with modern, award-winning design.

INNOVATIVE POSTAGE METER TECHNOLOGY

One-Button-Technology is at the heart of the PostBase range of franking machines, our icon driven touchscreen menu means that you instantly know how to use it.

The PostBase Ten carries out its first installation independently thanks to helpful on screen guides.

A LAN-interface enables lightning-fast software updates, postage rates and new advertising slogans online.

We designed PostBase Ten to have intuitive operation. A 4.3-inch colour touch-display easily guides the user to the desired action. Easy to use for the first time user and for multiple users.

In addition to its easy-to-use design, the PostBase Ten is the quietest machine in its class, for a calm work environment and minimal stress.

The modular PostBase Ten can be adapted to grow with your individual business requirements at any time.

Envelope sealer, automatic feeder, dynamic scale and a high-volume envelope stacker can easily be connected to the existing base unit. Memory for additional advertising slogans or cost-accounts can also be expanded making the PostBase Ten truly flexible.

01

Automatic feeder

Perfect impressions even on thick or unevenly-filled envelopes. The PostBase Ten guarantees smooth, reliable processing of mail up to 10mm thick.

02

Envelope sealer

Quickly and securely seals your mail automatically as it's processed through the system.

03

Dynamic scale

Ideal for efficient processing of mixed mail. PostBase Dynamic determines the size and weight of envelopes and automatically franks the correct postage. Up to 90 letter/minute depending on format.

04

Postage meter with label dispenser

Electronic inkjet postage system that combines award-winning design and customer focussed operation all in a small footprint.

05

Integrated static scale

Accurate precision weighing for large letters or small packages. The 7kg scale also offers differential weighing.

06

Collecting tray

Mail is neatly stacked ready for despatch.

ADVANCED | SIMPLICITY POSTBASE TEN DYNAMIC

ONE BUTTON

With just one button and a colour touchscreen, PostBase Ten is simple and easy to use with its icon driven menu system.

INTUITIVE OPERATION

PostBase Ten was designed with operators in mind, intuitive and simple to use, PostBase Ten guides users through operation.

ADJUSTABLE VIEW

The large colour touch-screen can be adjusted to six ergonomically optimal positions for the perfect view.

PROFESSIONAL APPEARANCE

Select two adverts or an advert plus SMS-text. Display your logo and customised messages on every mail piece.

PLUG & PLAY

Future proof configuration, two USB-ports and a high-speed LAN connection as well as Wi-Fi and 3G options.

HIGH CAPACITY LETTER STACKER

Unique in this segment, the optional mail stacker can hold up to 10kg and has space for approx. 250 C6/5 letters.

HIGH-SPEED WEIGHING

The dynamic scale recognises envelope size and shape "on-the-fly" and sends the information to the postage meter which calculates the right postage ready for printing, all at up to 90 letters per minute.

LATEST TECHNOLOGY

The PostBase Ten Dynamic system is the latest in the range of PostBase franking systems from FP, with blistering dynamic franking speeds and simple to use interface.

NAVIGATOR PLUS SOFTWARE GIVES YOU TOTAL CONTROL OVER YOUR POSTAGE SPEND

The unequalled PostBase Navigator Plus Software makes operating and configuring your PostBase postage meter even simpler and faster as well as allowing you to report on every mail piece.

Print, display and export cost account data into your preferred accounting system.

Simply use your existing PC or laptop as a "remote control" for your PostBase or use with a tablet PC – with a standard USB connection. The result is the world's biggest postage meter display: PostBase comfort in XXL.

At the same time, use the Navigator Software to review all data registered in your PostBase and print reports or lists at the press of a button. Postage can be analysed by postal product, by weight or by user, the timing can be adjusted flexibly. Reports can also be exported to common office software programmes in CSV-format allowing you to import it into your accounting software for analysis.
